Sommario/riassunto	In The Relationship between Economic, Social and Cultural Rights and International Humanitarian Law , Amrei Müller offers a detailed analysis of the legal consequences of the parallel application of economic, social and cultural (ESC) rights and international humanitarian law (IHL) to non-international armed conflicts. With a focus on health related issues, the book covers important topics like the scope of limitations to and derogations from ESC rights, questions related to the integration of the right to health in military-target decisions, states' obligations to mitigate the adverse public health impact of armed conflicts and obligations relating to the provision of humanitarian assistance. It moves the discussion about the parallel application of IHL and human

rights to a new level, highlighting its potential to enhance the protection of people affected by armed conflicts but also the difficulties involved.
