Sommario/riassunto	This book examines the nexus between exploring and tourism and argues that exploration travel – based heavily on explorer narratives and the promises of personal challenges and change – is a major trend in future tourism. In particular, it analyses how romanticised myths of explorers form a foundation for how modern day tourists view travel and themselves. Its scope ranges from the 'Golden Age' of imperial explorers in the 19th and early 20th centuries, through the growth of adventure and extreme tourism, to possible future trends including space travel. The volume should appeal to researchers and students across a variety of disciplines, including tourism studies, sociology, geography and history.

Sommario/riassunto	In this book, Pieter Seuren argues that Ferdinand de Saussure has been grossly overestimated over the past century, while his junior colleague Albert Secheyaye has been undeservedly ignored. Saussure was anything but the great innovator he is generally believed to be. Secheyaye was a genius providing many trenchant analyses and anticipating many modern insights. The lives and works of both men are discussed in detail and they are placed in the cultural, intellectual and social environment of their day. Much attention is paid to the theoretical issues involved, in particular to the notion and history of structuralism, to the great subject-predicate debate that dominated linguistic theory at the time, and to questions of methodology in the theory of language.
