Sommario/riassunto	Children of the Atomic Bomb is Dr. Yamazaki's account of a lifelong effort to understand and document the impact of nuclear explosions on children, particularly the children conceived but not yet born at the time of the explosions. Assigned in 1949 as Physician in Charge of the United States Atomic Bomb Casualty Commission in Nagasaki, Yamazaki had served as a combat surgeon at the Battle of the Bulge where he had been captured and held as a prisoner of war by the Germans. In Japan he was confronted with violence of another dimension - the devastating impact of a nuclear blast and the particularly insidious effects of radiation on children. Yamazaki's story is also one of striking juxtapositions, an account of a Japanese-

American's encounter with racism, the story of a man who fought for his country while his parents were interned in a concentration camp in Arkansas.

Sommario/riassunto	This open access book reimagines a deeper sustainability in dynamic organization. Offering multiple perspectives on arts, design thinking, leadership, knowledge and project management, Reimagining Sustainable Organization addresses our need for thinking and coping differently when facing the many unknowns of real-life enterprises in society. Drawing on process philosophy, real-world case studies, and examinations of business practices as well as management research, the authors explore knowledge creation towards reimagining sustainable organization. The book includes frameworks and conceptual tools as well as insights for further explorations. This book will be of interests to students, scholars and teachers, and practitioners who are studying sustainable organization, greener management, leadership ideas, or knowledge and project management. It covers

future pressing issues also for the professionals involved in co-creative work across organizational boundaries. This is an open access book.
