The present volume investigates the legacy of Gottlob Frege, Bertrand Russell and Ludwig Wittgenstein in contemporary philosophy of language and linguistics. These philosophers inspired both the development of analytic philosophy and various philosophical approaches to the study of language. They have influenced technical discussions on truth, proper names, definite descriptions, propositions and predication, sense and reference, truth, and philosophical and linguistic inquiries into the relations between language, mind and the world. The studies gathered in this volume discuss most of these issues and aim to show that the results of this research are still of utmost importance, and that the three philosophers have significantly contributed to the linguistic turn in philosophy and the philosophical turn in the study of language. The volume includes contributions by: Joachim Adler (Zurich), Maria Cerezo (Murcia), Pawel Grabarczyk (Lodz), Arkadiusz Gutt (Lublin), Tom Hughes (Durham), Gabriele Mras (Vienna), Carl Humphries (Cracow), Gary Kemp (Glasgow), Siu-Fan Lee (Hong Kong), Jaroslav Peregrin (Prague), Ulrich Reichard (Durham), Piotr Stalmaszczyk (Lodz), Piotr Szalek (Lublin), Mieszko Talasiewicz (Warsaw).

2. Record Nr.	UNINA9910779374303321

Sommario/riassunto	This reference focuses on decision-making styles within cultures. It focuses on cooperative, collaborative, avoidant, competitive, and dominant styles of decision making, and discusses how each process is modified by the culture. The contributors examine issues within culture that affect decision making, such as individualism and collectivism, considered the most important influences in decision making. This reference is one of 10 predicted to be derived from the 2012 Applied Human Factors and Ergonomics (AHFE) Conference--
