

1. Record Nr.	UNINA9910786837403321
Autore	Taylor Dorceta E.
Titolo	Toxic communities : environmental racism, industrial pollution, and residential mobility // Dorceta E. Taylor
Pubbl/distr/stampa	New York, NY : , : New York University Press, , [2014] ©2014
ISBN	1-4798-0515-7
Descrizione fisica	1 online resource
Classificazione	SOC026000LAW034000SOC031000
Disciplina	363.72870973
Soggetti	Democracy - Social aspects - United States Hazardous waste sites - Location - United States Hazardous waste sites - Social aspects - United States Environmental justice - United States United States Environmental conditions Social aspects
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Toxic exposure: landmark cases in the South and the rise of environmental justice activism -- Disproportionate siting: claims of racism and discrimination -- Internal colonialism: Native American communities in the West -- Market dynamics: residential mobility, or who moves and who stays -- Enforcing environmental protections: the legal, regulatory, and administrative contexts -- The siting process: manipulation, environmental blackmail, and enticement -- The rise of racial zoning: residential segregation -- The rise of racially restrictive covenants: guarding against infiltration -- Racializing blight: urban renewal, eminent domain, and expulsive zoning -- Contemporary housing discrimination: does it still happen?
Sommario/riassunto	"From St. Louis to New Orleans, from Baltimore to Oklahoma City, there are poor and minority neighborhoods so beset by pollution that just living in them can be hazardous to your health. Due to entrenched segregation, zoning ordinances that privilege wealthier communities, or because businesses have found the 'paths of least resistance,' there are many hazardous waste and toxic facilities in these communities, leading residents to experience health and wellness problems on top of

the race and class discrimination most already experience. Taking stock of the recent environmental justice scholarship, *Toxic Communities* examines the connections among residential segregation, zoning, and exposure to environmental hazards. Renowned environmental sociologist Dorceta Taylor focuses on the locations of hazardous facilities in low-income and minority communities and shows how they have been dumped on, contaminated and exposed. Drawing on an array of historical and contemporary case studies from across the country, Taylor explores controversies over racially-motivated decisions in zoning laws, eminent domain, government regulation (or lack thereof), and urban renewal. She provides a comprehensive overview of the debate over whether or not there is a link between environmental transgressions and discrimination, drawing a clear picture of the state of the environmental justice field today and where it is going. In doing so, she introduces new concepts and theories for understanding environmental racism that will be essential for environmental justice scholars. A fascinating landmark study, *Toxic Communities* greatly contributes to the study of race, the environment, and space in the contemporary United States"--Provided by publisher.
