Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Human Ecological Sustainability -- Review of Complexity and Complex Systems -- Multidimensional Challenges to Human Sustainability -- Mitigations of Human Impacts Through Technology -- Sustainable Agriculture -- Unconventional Foods : Insects, Plankton, Fungi and in vitro Meat -- Complex Economic Systems and Sustainability -- Application of Complex Systems Thinking to Solve Sustainability Problems -- What will happen to us? : FAQs on Sustainability -- Glossary.
Sommario/riassunto	Complex Systems is a new field of science studying how parts of a system give rise to the collective behaviors of the system, and how the system interacts with its environment. This book examines the complex systems involved in environmental sustainability, and examines the technologies involved to help mitigate human impacts, such as renewable energy, desalination, carbon capture, recycling, etc. It considers the relationships and balance between environmental engineering and science, economics, and human activity, with regard to

sustainability.

3. Record Nr.	UNINA9910134177403321
Titolo	Journal of Southeast Asian studies
Pubbl/distr/stampa	Singapore, : McGraw-Hill Far Eastern Publishers, 1970-
