The motor-bike boys were working-class motorcyclists who listened to the early rock 'n' roll of the late 1950's. In contrast, the hippies were middle-class drug users with long hair and a love of progressive music. Both groups were involved in an unequal but heroic fight to produce meaning and their own cultural forms in the face of a larger society dominated by the capitalist media and commercialism. They were pioneers of cultural experimentation, the self-construction of identity, and the curating of the self, which, in different ways, have become so widespread today. In Profane Culture.

Paul Willis develops an important and still very contemporary theory and methodology for understanding the constructions of lived and popular culture. His new preface discusses the ties between the cultural

moment explored in the book and t	oday.
