

1. Record Nr.	UNINA9910786905203321
Titolo	Materials for modern technologies : selected, peer reviewed papers from the 2014 Spring International Conference on Material Sciences and Technology (MST-S), April 16-18, 2014, Shanghai, China // edited by Yue Li
Pubbl/distr/stampa	Durnten, Switzerland ; ; Zurich, Switzerland : , : TTP, , 2014 ©2014
ISBN	3-03826-438-5
Descrizione fisica	1 online resource (338 p.)
Collana	Advanced Materials Research, , 1662-8985 ; ; Volume 906
Disciplina	620.11
Soggetti	Materials science Technology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references at the end of each chapters and indexes.
Nota di contenuto	Materials for Modern Technologies; Preface; Table of Contents; Chapter 1: Ceramic Materials and Technologies; Synthesis of Hierarchy-Structural BaTiO ₃ Powder Used for X8R Multilayer Ceramic Capacitors by Two-Step Soft Chemical Method; Effect of H ₃ BO ₃ Coating on the Microwave Dielectric Properties of BZN Ceramics; Dielectric Properties and Microstructure of BaO-Nd ₂ O ₃ -Bi ₂ O ₃ -TiO ₂ Microwave Ceramics with Li ₂ O-B ₂ O ₃ -SiO ₂ ; Effect of Process on the Dielectric Properties of BaTiO ₃ -Based X9R Ceramics; Improvement in the Low-Fire Dielectric Compositions with Middle Permittivity for LTCC Applications Low Temperature Sintering of Lead-Free BaTiO ₃ -Based X9R Ceramics with Bi ₂ O ₃ Dopant and Assisted by LiF-CaF ₂ Flux AgentChapter 2: Material Physics and Applied Chemistry; High Efficient Photoreduction CO ₂ with H ₂ O on Metal Cu-Modified Graphitic Ordered Mesoporous Carbon Supported TiO ₂ Catalysts under Simulated Solar; Processing Effect on the Compressive Strength and Bioactivity of Ti-Based Composites Produced with TiH ₂ and Calcium Phosphate; Rechargeable Alkali and Alkaline Earth Metal-Air Batteries - Potential and Challenges A Fluorescence Quenching Study for the Interaction of 2,6-bis(5-(p-methylphenyl)-1-H-pyrazol-3-yl)pyridine with Zn ²⁺ IonChapter 3:

Chemical Engineering and Technologies; Kinetics of Hydrogenolysis of Glycerol to Ethylene Glycol over Raney Ni Catalyst; Biocompatible LDH-Alginate Composites for the Adsorption of Naphthalene Anionic Dye AG 120: Influence of Alginate Concentration on the Adsorption Characteristics; Production of High-Purity Hydrogen and Carbon Dioxide Capture by Sorption Enhanced WGS Reaction Process; Epoxidation of Palm Kernel Oil-Based Crude Oleic Acid Effect of Pretreatment on Adsorption of Nickel by Oil Palm Mesocarp Fiber Study on the Extraction of Phenolic Compounds from Model Oil by Using Ionic Liquid; Recent Development of Biomass Fast Pyrolysis Technology and Bio-Oil Upgrading: An Overview; Gasification of Oil Palm Biomass to Produce Syngas for Electricity Generation - Cost Benefit Analysis; Thermal Behaviour of Slurry Prepared from Clermont Bituminous Coal and Oil Palm Empty Fruit Bunch Bio-Oil; Regeneration of Activated Carbon Using Photo-Oxidation Process Effect of Sisal Fiber Surface Treatments on Sisal Fiber Reinforced Polypropylene (PP) Composites

Sommario/riassunto

Collection of selected, peer reviewed papers from the 2014 Spring International Conference on Material Sciences and Technology (MST-S), April 16-18, 2014, Shanghai, China. The 52 papers are grouped as follows: Chapter 1: Ceramic Materials and Technologies, Chapter 2: Material Physics and Applied Chemistry, Chapter 3: Chemical Engineering and Technologies, Chapter 4: Nano-Materials and Technologies, Chapter 5: Biomaterials, Chapter 6: Metals and Alloy, Chapter 7: Materials Processing in Mechanical Engineering, Chapter 8: Materials of Engineering Structures
