Sommario/riassunto	<P>The current fashion for rolling back the state has seen the nonprofit or third sector playing an increasing role in what were previously the heartlands of the public sphere. The growing significance of the sector and its increasing reliance on public funds mean it has also attracted increased scrutiny. From outside the sector concerns have been raised about the accountability and performance of nonprofit organizations. From within the sector there has been considerable debate about whether the increased reliance on government contracts is in danger of undermining the sector's independence.
