toward an integrated approach to crimes against present and future
generations / Riane Eisler -- The responsibility to prevent : early
warning systems to protect future generations / Maja Gopel -- ;
Conclusion. Protecting the rights of future generations through existing
and new international criminal law / Sebastien Jodoin.

Sommario/riassunto

Sustainable Development, International Criminal Justice, and Treaty Implementation provides a serious and timely perspective on the relationship between two important and dynamic fields of international law. Comprising chapters written by leading academics and international lawyers, this book examines how the principles and practices of international criminal law and sustainable development can contribute to one another's elaboration, interpretation and implementation. Chapters in the book discuss the potential and limitations of international criminalization as a means for protecting the basic foundations of sustainable development; the role of existing international crimes in penalizing serious forms of economic, social, environmental and cultural harm; the indirect linkages that have developed between sustainable development and various mechanisms of criminal accountability and redress; and innovative proposals to broaden the scope of international criminal justice. With its rigorous and innovative arguments, this book forms a unique and urgent contribution to current debates on the future of global justice and sustainability.
