

1. Record Nr.	UNINA9910786981003321
Titolo	Environmental considerations in energy production [[electronic resource] /] / edited by John R. Craynon
Pubbl/distr/stampa	Englewood, Colorado, : Society for Mining, Metallurgy, and Exploration, Inc. (SME), 2013
ISBN	1-62198-762-0 0-87335-381-1
Descrizione fisica	1 online resource (552 p.)
Altri autori (Persone)	CraynonJohn R
Disciplina	621.31/210286
Soggetti	Electric power production - Environmental aspects
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Application of Electronic Sorting Technology for Reducing Environmental Impacts of Coal Processing Stabilization of Fine Coal Waste as an Alternative Disposal Technique; Application of a Pilot-Scale Plate Filter Press in Dewatering Coal Slurries; Diesel Range Organics In Coal Preparation; Minimizing the Environmental Impacts of Coal Waste Disposal; 2.2 Community Well-Being; Decision Tools for Integrating Sustainability Considerations in Large Capital Projects; The Mining Industry and Community Poverty Across Appalachia Edgework and Boundary Crossings: Assessing Foundations for Public Ecology in the Appalachian Region Determinants of Local Community Acceptance of Energy Resources and Materials Mining; Ethics and Community Well-Being; 3.1 Coal, Gas, and Energy Production; Appalachian Coal: Past, Present, and Future; Environmental Considerations and Operational Parameters of Underground Coal Gasification; The Marcellus Shale Gas Play and the Gas Migration/Stray Gas Problem; Experiences in Reservoir Model Calibration for Coal Bed Methane Production in Deep Coal Seams in Russell County, Virginia 4.1 Total Dissolved Solids and Environmental Impacts Comparison of Groundwater Seepage Modeling in Conventional and Geomorphic Valley Fill Design; Predicting Total Dissolved Solids Release from Overburden in Appalachian Coal Fields; Natural Attenuation of TDS in Mountaintop Mines; Predicting TDS Release from Appalachian Mine Spoils; Long-

Term Trends of Electrical Conductivity in Streams Flowing Out of
Headwater Valley Fills in Virginia; 4.2 Environmental Considerations in
Underground Mining; Event Tree Failure Mode Development for Mining
Near Bodies of Water
Applications of Subsurface Subsidence Model to Study Longwall
Subsidence Influences on Overburden Hydrological System
