| Sommario/riassunto      | Most businesses face the choice of either competing on the 'low road' of cost, or the 'high road' of innovation and value. Much the same goes for national economies and the UK is no exception. But how do businesses - and the people who manage them - go beyond the policy prescription and the easy exhortation to make that shift, to manage change and go well beyond business as usual? This ground-breaking book - the combined insight of some of the best minds in management, grouped together in the Advanced Institute of Management Research - does just that. It presents a clear and crisp analysis of the context and the challenge; and offers managers a range of ideas on how to develop the competences, practices and values that can make a difference. It is essential reading for policy makers, analysts, academics, and managers to be who want to make a different future. |

Failing fathers, failing sons -- ch. 5. Finding ethnic identity and a place in Western society -- ch. 6. Psychoanalysis in the age of the designed self.   |
| Sommario/riassunto      | What can contemporary psychoanalysis bring to the understanding of Generation X, a cohort for whom the trivialization of a dizzying array of possible experiences teamed with the pressure to lead spectacular lives often leads to diffuse feelings of confusion, depression, and disorientation. The Designed Self chronicles Strenger's therapeutic encounters with five extraordinarily gifted young adults for whom the ideal of authenticity long associated with the Baby-Boom generation was supplanted by the need to experiment endlessly with the self. Perpetual self-experimentation, constantly r |
