Sommario/riassunto

The East Asia and Pacific (EAP) region has an international emigrant population of more than 21 million people who remitted US\$112 billion to their home countries in 2013. The region also hosts more than 7 million migrant workers, mostly from other Asian countries. These migrant workers account for 20 percent or more of the labor force in economies such as Malaysia and Singapore and thus play a significant role in the economies of the labor-receiving countries. An aging population in many East Asian countries will create significant labor shortages, leading to greater demand for migrant workers
