Sommario/riassunto	The yew is the oldest and most common tree in the world, but it is a plant of puzzling contradictions: it is a conifer with juicy scarlet berries, but no cones; deer can feast on its poisonous foliage, but it is lethal to farm animals; and it thrives where other plants cannot because of its extraordinarily low rate of photosynthesis. Exploring this paradoxical plant in Yew, Fred Hageneder surveys its position in religious and cultural history, its role in the creation of the British Empire, and its place in modern medicine. Hageneder explains the way the yew is able to renew itself from the i
