Sommario/riassunto	Offering a new way of thinking about demographic engineering ('hard demography' versus 'soft demography') and how ethnic groups in conflict deploy demographic strategies, this book will have a broad appeal to demographers, geographers and political scientists. It asks

how policies have been framed and implemented to change the demography of ethnic groups on the ground in their own interests. It also examines how successful these policies have been, focusing on the cases of Sri Lanka, Israel / Palestine, Northern Ireland and the U.S.A.
