Sommario/riassunto	In the first book to seriously examine the future of libraries in a climate reality-based context, Henk convincingly argues that building a carbon-neutral future for libraries is not only essential but eminently

practical. Using the "three E's" of sustainability (ecology, economy, equity) as a foundation, she traces the development of sustainability from its origins in the 1970's to the present, laying out a path librarians can take at their own institutions to begin the process of building a carbon-neutral library. Rooted in the latest science but firmly focused on concrete action, her book...
