Livello bibliografico	Monografia
Note generali	Part of: 2014 digital library.
Nota di bibliografia	Includes bibliographical references (pages 119-121) and index.
Nota di contenuto	1. Supply chain information systems -- 2. Development of ERP and SCM -- 3. Supply chain management software option -- 4. Business process reengineering in supply chains -- 5. System selection -- 6. Supply chain software installation project management -- 7. Recapitulation -- Notes -- References -- Index.
Sommario/riassunto	The rapid growth in computer technology provides supply chain managers with valuable tools to better coordinate and control their operations. This book seeks to describe systems available to give supply chains information system support, demonstrating key tasks with demonstrated analytic techniques. This second edition is basically the same as the first edition, but with newer cases to demonstrate concepts. The target market for this book is practitioners in the supply chain management field, one of the fastest growing fields in our economy.

Sommario/riassunto

Atlas of Lymph Node Pathology reviews the histopathology of nodal diseases, illustrating the use of ancillary studies and includes concise discussions of pathogenesis, clinical settings and clinical significance of the pathologic diagnosis. The atlas features an overview of the benign reactive processes secondary to infectious, environmental or unknown insults, as well as relevant illustrations of virtually all primary and secondary neoplasms involving lymph nodes. The atlas also includes macroscopic images of some disorders, tables that help readers

understand and comprehend diseases that look alike, and diagnostic algorithms for certain groups of diseases. Authored by highly experienced pathologists, Atlas of Lymph Node Pathology is a valuable resource that illustrates the vast majority of diseases practicing pathologists, clinicians and oncologists are likely to encounter in daily practice.
