## Sommario/riassunto

In this article, the historical development of sentential negation is compared across the Japonic, Koreanic, Tungusic, Mongolic, and Turkic languages to make inferences about the expression of negation in the common Transeurasian proto-language. Integrating typological considerations, including grammaticalization theory, into the argumentation, the approach taken here differs from previous studies, which are limited to form-function comparison of individual markers. The historical development of negation in the Transeurasian languages is argued to involve a grammaticalization pathway whereby a
