

1. Record Nr.	UNINA9910787145803321
Titolo	The influence of global environmental change on infectious disease dynamics : workshop summary / / Institute of Medicine (U.S.) ; Eileen R. Choffnes and Alison Mack, rapporteurs Forum on Microbial Threats Board on Global Health
Pubbl/distr/stampa	Washington, District of Columbia : , : National Academies Press, , 2014 ©2014
ISBN	0-309-30502-0 0-309-30500-4
Descrizione fisica	1 online resource (444 p.)
Disciplina	614.4
Soggetti	Communicable diseases - Epidemiology Global warming - Health aspects Emerging infectious diseases - Epidemiology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di contenuto	""Front matter ""; ""Workshop Overview""; ""Appendix A: Contributed Manuscripts""; ""Appendix B: Agenda""; ""Appendix C: Acronyms""; ""Appendix D: Glossary""; ""Appendix E: Speaker Biographies""
Sommario/riassunto	"The twentieth century witnessed an era of unprecedented, large-scale, anthropogenic changes to the natural environment. Understanding how environmental factors directly and indirectly affect the emergence and spread of infectious disease has assumed global importance for life on this planet. While the causal links between environmental change and disease emergence are complex, progress in understanding these links, as well as how their impacts may vary across space and time, will require transdisciplinary, transnational, collaborative research. This research may draw upon the expertise, tools, and approaches from a variety of disciplines. Such research may inform improvements in global readiness and capacity for surveillance, detection, and response to emerging microbial threats to plant, animal, and human health. The Influence of Global Environmental Change on Infectious Disease Dynamics is the summary of a workshop hosted by the Institute of

Medicine Forum on Microbial Threats in September 2013 to explore the scientific and policy implications of the impacts of global environmental change on infectious disease emergence, establishment, and spread. This report examines the observed and potential influence of environmental factors, acting both individually and in synergy, on infectious disease dynamics. The report considers a range of approaches to improve global readiness and capacity for surveillance, detection, and response to emerging microbial threats to plant, animal, and human health in the face of ongoing global environmental change" --Publisher's description.

2. Record Nr.	UNINA9910979883203321
Titolo	Norme, governo, soggettività : un percorso tra filosofia e politica / a cura di Marianna Esposito e Sandro Luce
Pubbl/distr/stampa	Torino, : Giappichelli, c2024
ISBN	979-12-211-0840-8
Descrizione fisica	XVI, 218 p. ; 24 cm
Disciplina	320.01
Locazione	FGBC
Collocazione	XI N 842
Lingua di pubblicazione	Italiano
Formato	Materiale a stampa
Livello bibliografico	Monografia
