

1. Record Nr.	UNINA9910787154003321
Titolo	The potential consequences of public release of food safety and inspection service establishment-specific data // Committee on a Study of Food Safety and Other Consequences of Publishing Establishment-Specific Data, Board on Agriculture and Natural Resources, Division on Earth and Life Studies, National Research Council of the National Academies
Pubbl/distr/stampa	Washington, District of Columbia : , : National Academies Press, , 2011 ©2011
ISBN	0-309-22468-3 0-309-22466-7
Descrizione fisica	1 online resource (114 p.)
Disciplina	363.19/20973
Soggetti	Food adulteration and inspection - United States - Information resources Food industry and trade - United States - Safety measures Food industry and trade - Risk management - United States Disclosure of information - United States Government information - United States
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Background -- Transparency and food safety and inspection service data-sharing -- Experience with public posting of government data -- Public release of food safety and inspection service establishment-specific data.
Sommario/riassunto	Legal regulations and manufacturers' monitoring practices have not been enough to prevent contamination of the national food supply and protect consumers from serious harm. In addressing food safety risks, regulators could perhaps better ensure the quality and safety of food by monitoring food production not just at a single point in production but all along the way, from farm to table. Recognizing the troubled state of food safety, the Institute of Medicine's (IOM) Food Forum met in Washington, DC, on September 9, 2008, to explore the management

of food safety practices from the beginning of the supply chain to the marketplace.
