Sommario/riassunto	A hinge moment in recent American history, 1995 was an exceptional year. Drawing on interviews, oral histories, memoirs, archival collections, and news reports, W. Joseph Campbell presents a vivid, detail-rich portrait of those memorable twelve months. This book offers fresh interpretations of the decisive moments of 1995, including the emergence of the Internet and the World Wide Web in mainstream American life; the bombing at Oklahoma City, the deadliest attack of domestic terrorism in U.S. history; the sensational "Trial of the Century," at which O.J. Simpson faced charges of double murder; the U. S.-brokered negotiations at Dayton, Ohio, which ended the Bosnian War, Europe's most vicious conflict since the Nazi era; and the first encounters at the White House between Bill Clinton and Monica Lewinsky, a liaison that culminated in a stunning scandal and the spectacle of the president's impeachment and trial. As Campbell

demonstrates in this absorbing chronicle, 1995 was a year of extraordinary events, a watershed at the turn of the millennium. The effects of that pivotal year reverberate still, marking the close of one century and the dawning of another.

Sommario/riassunto

"In this important contribution, Stratos Georgoulas offers a comprehensive and in-depth exploration of the origins of critical criminology. Rarely do traditional textbooks cover this material in enough depth for readers to truly understand the historical developments of criminology. Georgoulas conveys his innovative review in a fascinating way that takes the reader into new realms rarely visited in criminology. Students and scholars alike will gain invaluable insights and engage with the rich history presented here." - Chad Posick, Associate Professor of Criminal Justice & Criminology, Georgia Southern University, USA "The Origins of Radical Criminology is a major work. In its three volumes published so far, Stratos Georgoulas conducts a genealogical tour de force against the criminological hegemony that shapes our worldview; a truly critical exercise that, by definition, can only achieve its goal from a radical approach. And so it does, to remind us that the history of resistance is as long and diverse as the history of the powers they must confront, and that the fight goes on." - Daniel Jiménez-Franco, Coordinator of the European Group for the Study of Deviance & Social Control, Universidad de Zaragoza, Spain This book critically explores the development of radical criminological thought through the social, political and cultural history of the Middle Ages to the Renaissance. It follows on from the previous volume which examined Classical Greece until the emergence of the early Christian movement in the Roman empire. Through separate chapters, it discusses the key literature (myths, fairy tales and Shakespeare), religions and philosophers of the era, and the development of early radical views and issues over time. This book examines the links between the origins of radical criminology and its future. It speaks to those interested in the (pre)history of criminology and the historical production of criminological knowledge, drawing on Criminology, Sociology, Classics, History, Philosophy, Ancient Literature and Politics. Stratos Georgoulas is Professor and Deputy Head of the Department of Sociology at the University of the Aegean, Greece. He is recognized in the scientific field of Critical Criminology, winning international awards for teaching in the USA (Fulbright), Canada, Slovakia, Syria, Jordan and Palestine.
