

1. Record Nr.	UNINA9910787184703321
Autore	Sage Daniel <1980->
Titolo	How outer space made America : geography, organization and the cosmic sublime // Daniel Sage
Pubbl/distr/stampa	Farnham, Surrey, United Kingdom ; ; Burlington, Vermont : , : Ashgate, , [2014] ©2014
ISBN	1-315-58718-1 1-317-12078-7 1-4724-2367-4
Descrizione fisica	1 online resource (192 p.)
Disciplina	629.4/10973
Soggetti	Astronautics - United States - History Astronautics - Social aspects - United States National characteristics, American Outer space Exploration United States History Outer space Exploration Social aspects United States
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	America as transcendental -- Framing a world beyond -- Placing the moon -- Technocracy in the space age -- Whose body for whose future? -- Was revolution ever in the air? -- Memorializing the future -- Traumatizing spaceflight -- Critical cosmopolitics.
Sommario/riassunto	In this innovatory book Daniel Sage analyses how and why American space exploration reproduced and transformed American cultural and political imaginations by appealing to, and to an extent organizing, the transcendence of spatial and temporal frontiers. While largely engaging with the historical development of space exploration, it shows how contemporary cultural and social, and indeed geographical, research themes, including national identity, critical geopolitics, gender, technocracy, trauma and memory, can be informed by the study of space exploration.
