Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references (pages 101-104) and index.
Nota di contenuto	1. Introduction -- 2. Where do we start? -- 3. The information ladder -- 4. What constitutes the right data? -- 5. How do we get information to the right place? -- 6. When is the right time? -- 7. How do we identify the right person? -- 8. What is the right format for the information? -- 9. Security -- 10. The internet of things -- 11. Putting it all together -- 12. Making it work -- Glossary -- Notes -- References -- Index.
Sommario/riassunto	Information systems are a critical component of business success today. Unfortunately, many companies do not truly understand what an information system is; where, when, and how it should be implemented; or the effects of integrating it into the organization. As such, we continue to see implementation horror stories of projects run amuck--going over time and over budget--or information systems that never get fully implemented, requiring "work-arounds" by employees in order to get things done. Why is this the case? Are information systems so poorly developed, or is it more a case of companies not understanding what information systems are and how to integrate them into their business processes? The premise of this book is that it is the latter. If decision makers better understood what information systems are, how they worked, and, most importantly, what constitutes a successful information system; then implementations would be

smoother, and benefits from information systems would be greater and last longer. The intent of this book is to help organizations better utilize their information systems by understanding the fundamental purpose of these systems within the business organization. This book will help readers analyze business processes with an eye toward how data is created, transferred, analyzed, and used within the organization. From this understanding, the user can then design, build, and implement information systems that accurately reflect the flow of the business processes, adjust quickly to support critical functions, and provide efficient and effective value-added services to employees to maximize the profitability of the company.

Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references at the end of each chapters.
Sommario/riassunto	"Buttressed by a wealth of new, collaborative research methods and technologies, the contributors of this collection examine women's writing in Canada, past and present, with 11 essays in English and 5 in French. Regenerations was born out of the inaugural conference of the Canadian Writing Research Collaboratory held at the Canadian

Literature Centre, University of Alberta, and exemplifies the progress of radically interdisciplinary research, collaboration, and publishing efforts surrounding Canadian women's writing. Researchers and students interested in Canadian literature, Quebec literature, women's writing, literary history, feminist theory, and digital humanities scholarship should definitely acquaint themselves with this work. Contributors: Nicole Brossard, Susan Brown, Marie Carriere, Patricia Demers, Louise Dennys, Cinda Gault, Lucie Hotte, Dean Irvine, Gary Kelly, Shauna Lancit, Mary McDonald-Rissanen, Lindsey McMaster, Mary-Jo Romaniuk, Julie Roy, Susan Rudy, Chantal Savoie, Maite Snauwaert, Rosemary Sullivan, and Sheena Wilson."--
