Sommario/riassunto	Geriatric Psycho-Oncology is a comprehensive handbook that provides best practice models for the management of psychological, cognitive,

and social outcomes of older adults living with cancer and their families. Chapters cover a wide range of topics including screening tools and interventions, psychiatric emergencies and disorders, physical symptom management, communication issues, and issues specific to common cancer sites. A resource section is appended to provide information on national services and programs. This book features contributions from experts designed to help clinicians review,
