Practical issues of REDD+ implementation; 16 Can strategic environmental and social assessment of REDD+ improve forest governance?; 17 Conclusion: directions for research and implications for policy; Index

Sommario/riassunto

Forest tenure reforms are occurring in many developing countries around the world. These reforms typically include devolution of forest lands to local people and communities, which has attracted a great deal of attention and interest. While the nature and level of devolution vary by country, all have potentially important implications for resource allocation, local ecosystem services, livelihoods and climate change. This book helps students, researchers and professionals to understand the importance and implications of these reforms for local environmental quality, climate change, and the liv
