Soggetti	Business logistics - Environmental aspects Green products
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Part of: 2013 digital library.
Nota di bibliografia	Includes bibliographical references (pages 93-102) and index.
Nota di contenuto	1. Why should we care? -- 2. What is sourcing to support the green initiative? -- 3. What are some key concepts in understanding green sourcing and its impacts? -- 4. What industries and sectors lead the way: part 1 -- 5. What industries and sectors lead the way: part 2 -- 6. What is the relationship between transportation and green sourcing? -- 7. A path forward -- Notes -- References -- Index.
Sommario/riassunto	The "green" or environmental sustainability movement has taken hold throughout the world. Its staying power is confirmed by the fact that environmental emphasis in organizations did not decrease during the recent global recession, but rather increased. Organizations see that greater environmental emphasis in their product and service offerings not only helps their image, but also may reduce inefficiency, waste, and corresponding cost. However, since most organizations rely heavily on their supply base for providing components, materials, and services that become part of their final products, organizations must revisit their sourcing processes and choices to have a real impact on the environment.
