

1. Record Nr.	UNINA9910787331003321
Titolo	Biosurfactants : research trends and applications // edited by Catherine N. Mulligan, Sanjay K. Sharma, Ackmez Mudhoo
Pubbl/distr/stampa	Boca Raton, FL : , : Taylor & Francis, , [2014] ©2014
ISBN	0-429-09886-3 1-4665-1823-5
Descrizione fisica	1 online resource (346 p.)
Disciplina	541.33 541/.33
Soggetti	Biosurfactants Surface chemistry
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	A CRC title.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Front Cover; Back Cover
Sommario/riassunto	Microbially derived surfactants, called biosurfactants, provide a promising alternative to synthetic surfactants, displaying better availability and being generally nontoxic and biodegradable. Biosurfactants also have the advantage of diverse chemical properties and the potential to be less expensive. They demonstrate properties such as reducing surface tension, stabilizing emulsions, and promoting foaming. With many promising research results, a consolidated resource of biosurfactant knowledge is needed to build a framework for further development of applications. Biosurfactants: Resear
