Sommario/riassunto "The US-led coalition which launched an invasion of Iraq on 20 March 2003 led to a decade-long military presence in the country. In the runup to that invasion, many comparisons were made with the 1991 Gulf War. Ahmed Ijaz Malik takes these two instances of military intervention by Republican US governments to highlight how the official discourse of leaders and decision-makers has an impact on foreign policy and its results. By taking these two examples, he examines how

discourse affects real events, and the extent to which the legacy of the

Cold War has influenced the decisions which are made at the upper echelons of the US government.--Provided by publsier."--Bloomsbury Publishing.
