Sommario/riassunto

In this volume, African scholars engaged in research on the continent reflect on their recent and ongoing empirical studies. They discuss the strengths and limitations of research methods, theories, and interventions designed outside Africa to spur innovative research on the continent. And they explore how insights from African philosophical, theoretical, and empirical work can be combined with exogenous forms of knowledge to generate understanding of the processes of African children's development in ways that are responsive to local contexts and meaningful for indigenous stakeholders. A ne
