Titolo	IEEE Std 1707-2015 : IEEE Recommended Practice for the Investigation of Events at Nuclear Facilities // Institute of Electrical and Electronics Engineers
Pubbl/distr/stampa	Piscataway, New Jersey : , : IEEE, , 2015
ISBN	0-7381-9983-4
Descrizione fisica	1 online resource (37 pages)
Disciplina	621.31015118
Soggetti	Electric power systems - Mathematical models Electric power systems - Reliability
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Common terminology and recommended practices for initiating and conducting event investigations, analyzing data, producing results, and identifying corrective actions associated with facility personnel, processes, equipment, and systems at nuclear facilities are provided in this document. The scope of event investigation activities addressed includes, but is not limited to, root cause analysis, which is an in depth investigation process used to identify primary causes of an event based on the systematic and consistent use of analysis tools. This recommended practice can be used for the investigation of all events and allows the use of a graduated approach to the depth of the investigation based upon the event significance.

Sommario/riassunto	It is interesting that women who campaign for women's rights and interests in Iran have not considered engaging with women who are neither conventional Muslims nor strongly secular, but instead explore other aspects of religion and spirituality. The women examined in this study identify themselves as believers in God, but have different views of religion; some wish to be called religious but do not follow the official Islamic Shia and have their own interpretation of what it means to be a goo.

3. Record Nr.	UNIORUON00396301
Titolo	Anzeiger für Slavische Philologie : Band 6. / Herausg. von Rudolf Aitzetmüller, Stanislaus Hafner und Linda Sadnik
