Sommario/riassunto	The allegories of the virtues and vices were a common teaching tool in the Middle Ages for both religious and lay audiences to learn the basic tenets of the Christian faith. The Mirroure of the Worlde makes available for the first time the unique text in the fifteenth-century British manuscript, MS. Bodley 283, which is among the last and largest works in the tradition of lay religious instruction mandated by the Fourth Lateran Council. The Mirroure is derived from conflations of the Miroir du Monde and the Somme le Roi, both vernacular treatises on vices and virtues compiled in Northeast France in the thirteenth century. Translated into Middle English by, it is believed, Stephen

Scrope, the foremost English translator of the mid-fifteenth century, this edition is one of the only books of virtues and vices that contains Latin text, an inclusion that points towards a more widespread knowledge of the language among the laypeople than previously thought. Complete with explanatory notes and a glossary, *The Mirroure of the Worlde* widens the understanding of medieval moral instruction, religion, reading practices, and education.

Sommario/riassunto

This volume provides an overview of cyber economic crime in India, analyzing fifteen years of data and specific case studies from Mumbai to add to the limited research in cyber economic crime detection. Centering around an integrated victim-centered approach to investigating a global crime on the local level, the book examines the criminal justice system response to cyber economic crime and proposes new methods of detection and prevention. It considers the threat from a national security perspective, a cybercrime perspective, and as a technical threat to business and technology installations. Among the topics discussed: Changing landscape of crime in cyberspace Cybercrime typology Legal framework for cyber economic crime in India Cyber security mechanisms in India A valuable resource for law enforcement and police working on the local, national, and global level in the detection and prevention of cybercrime, Cyber Economic Crime in India will also be of interest to researchers and practitioners working in financial crimes and white collar crime.
