| Note generali           | Description based upon print version of record.   |
| Nota di bibliografia    | Includes bibliographical references and index.  |
| Nota di contenuto       | Specimen receiving and processing -- Core chemistry -- Therapeutic drug monitoring/toxicology -- Point of care testing -- Endocrine/tumor markers/special chemistry -- Laboratory information systems/informatics -- Laboratory safety -- Outreach testing.   |
| Sommario/riassunto      | As with other volumes in the Diagnostic Standards of Care series, Clinical Chemistry focuses specifically on understanding potential problems and sources of error in management of the clinical chemistry testing procedures, how to anticipate and avoid such problems, and how to manage them if they occur. The discussions are concise, practical, specific, and problem-based so the book directly addresses the situations and issues faced by the clinical pathologist or other manager or staff member of the chemistry team. Discussion of each problem is augmented by a case discussion giving a real-world |
