

1. Record Nr.	UNINA9910787574203321
Titolo	Ecology and conservation of the maned wolf : multidisciplinary perspectives // edited by Adriana G. Consorte-McCrea and Eliana Ferraz Santos
Pubbl/distr/stampa	Boca Raton : , : CRC Press, , 2014
ISBN	0-429-09631-3 1-4665-1259-8
Descrizione fisica	1 online resource (350 p.)
Disciplina	599.77
Soggetti	Maned wolf - Ecology Maned wolf - Conservation Maned wolf - Habitat Wolves - Conservation
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	part I. The species and ecology -- part II. Case studies and conservation programs -- part III. Perspectives for the future.
Sommario/riassunto	Wolves are controversial figures worldwide and much effort has focused on how to conserve them while addressing public concerns. With its solitary habits and fruit-eating diet, the endangered maned wolf roams the South American grasslands and swamps, playing a vital part in maintaining biodiversity hotspots. Compared to the grey wolf, little is known about its relationship with local people and the environment and the reasons for its decline, making research about this unique species an urgent concern. Ecology and Conservation of the Maned Wolf: Multidisciplinary Perspectives
