1. Record Nr. UNINA9910787575703321

| | |
|---|---|
| Titolo | Advanced nanomaterials for aerospace applications / / edited by Carlos R. Cabrera, Felix A. Miranda |
| Pubbl/distr/stampa | Boca Raton, FL : , : CRC Press : , : Pan Stanford Publishing, , [2015]<br>©2015 |
| ISBN | 0-429-17174-9<br>981-4463-18-3 |
| Descrizione fisica | 1 online resource (389 p.) |
| Disciplina | 617.60028 |
| Soggetti | Nanostructured materials - Industrial applications<br>Nanotechnology - Research |
| Lingua di pubblicazione | Inglese |
| Formato | Materiale a stampa |
| Livello bibliografico | Monografia |
| Note generali | Description based upon print version of record. |
| Nota di bibliografia | Includes bibliographical references at the end of each chapters. |
| Nota di contenuto | Front Cover; Contents; Preface; Chapter 1 - Advanced Sensor Nanomaterials for Aerospace Applications; Chapter 2 - Challenges and Possibilities in Nanosensor Technology; Chapter 3 - Nanoporous Materials in Atmosphere Revitalization; Chapter 4 - Nanotechnology in Advanced Life Support: Water Recycling; Chapter 5 - Nanomaterials for Advanced Lithium-Ion Battery Anodes; Chapter 6 - Advances in Designing High-Energy Cathode Materials for Li-Ion Rechargeable Batteries; Chapter 7 - Nanomaterials in Regenerative Fuel Cells; Chapter 8 - Nanotechnology for Nanoelectronic Devices<br>Chapter 9 - Brief Introduction to Nanocomposites for Electromagnetic ShieldingChapter 10 - Epoxy Nanocomposite Based on Carbon Nanotubes for Electromagnetic Interface Shielding; Chapter 11 - Bringing NASA-Relevant Nanotechnology Research into the Classroom; Chapter 12 - Future Directions in Nanotechnology R&D at NASA; Back Cover |
| Sommario/riassunto | Advanced Nanomaterials for Aerospace Applications has been developed for a community interested in space science and nanotechnology. Scientists and engineers from several NASA field centers and the Jet Propulsion Laboratory, University of Puerto Rico, The Pennsylvania State University, and INFN-Laboratori Nazionali di |

Frascati, Italy, have joined efforts to discuss the applications of nanomaterials in sensors, atmosphere revitalization in habitable space platforms, life support systems, regenerative fuel cells, lithium-ion batteries, robust lightweight materials, nanoelectronics, and electroma
