

1. Record Nr.	UNINA9910787591303321
Titolo	Critical care in spinal cord injury // editor, Michael G. Fehlings
Pubbl/distr/stampa	London, England : , : Future Medicine Ltd., , [2013] ©2013
ISBN	1-78084-180-9
Edizione	[1st ed.]
Descrizione fisica	1 online resource (169 p.)
Disciplina	617.482044
Soggetti	Spinal cord - Wounds and injuries Critical care medicine Treatment
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di contenuto	Title page; Copyright page; Contents; Foreword. Critical care in spinal cord injury; 1. Epidemiology of traumatic and nontraumatic spinal cord injury; 2. Novel insights into pathophysiology and emerging therapeutic opportunities; 3. Imaging evaluation of the injured spinal column and spinal cord; 4. Acute spinal cord injury: clinical evaluation, diagnosis and classification; 5. Nonoperative management of acute spinal cord injury; 6. Surgery for acute spinal cord injury; 7. Principles of spinal cord rehabilitation; 8. Prognosis for spinal cord injury 9. Emerging therapies for traumatic spinal cord injuryIndex
Sommario/riassunto	Injuries to the spinal cord can be truly devastating for the individual and more widely impose a substantial burden on healthcare funding and resourcing. This book, authored by renowned experts, provides a clear and concise introduction to spinal cord injury with up-to-date information in an ever-evolving field. There are chapters on epidemiology, pathophysiology, assessment, use of imaging technologies, diagnosis and classification, available treatments and prognosis. Longer-term care, rehabilitation and prognosis are also highlighted. The book concludes with an overview of emerging therapies
