Sommario/riassunto	Focusing on the vulnerability and resilience to economic shocks at the household level, this book draws on extensive research activities carried out in two Melanesia countries: the Solomon Islands and Vanuatu. In particular, the book identifies the household impacts of the recent food, fuel and economic crises. The authors also examine

resilience by identifying how households responded to these recent economic events in order to cope with their impacts. The authors highlight key areas in which public policy and development programmes can reduce household vulnerability and increase their resili
