

1. Record Nr.	UNINA9910787638203321
Autore	Meckel Richard A. <1948->
Titolo	Classrooms and clinics : urban schools and the protection and promotion of child health, 1870-1930 // Richard A. Meckel
Pubbl/distr/stampa	New Brunswick, New Jersey : , : Rutgers University Press, , [2013] ©2013
ISBN	0-8135-6540-5
Descrizione fisica	1 online resource (286 p.)
Collana	Critical Issues in Health and Medicine
Disciplina	362.1083
Soggetti	Child health services - United States Education, Urban - Health aspects - United States City children - Medical care - United States Children with social disabilities - United States
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Front matter -- Contents -- Acknowledgments -- Introduction -- Chapter 1. Going to School, Getting Sick: Mass Education and the Construction of School Diseases -- Chapter 2. Incubators of Epidemics: Contagious Disease and the Origins of Medical Inspection -- Chapter 3. Defective Children, Defective Students: Medicalizing Academic Failure -- Chapter 4. Building Up the Malnourished, the Weakly, and the Vulnerable: Penny Lunches and Open- Air Schools -- Chapter 5. From Coercion to Clinics: The Contested Quest to Ensure Treatment -- Chapter 6. The Best of Times, the Worst of Times: Expansion and Reorientation in the Postwar Era -- Epilogue: Contraction, Renovation, and Revival -- Notes -- Index -- About the Author
Sommario/riassunto	Classrooms and Clinics is the first book-length assessment of the development of public school health policies from the late nineteenth century through the early years of the Great Depression. Richard A. Meckel examines the efforts of early twentieth-century child health care advocates and reformers to utilize urban schools to deliver health care services to socioeconomically disadvantaged and medically underserved children in the primary grades. Their goal, Meckel shows, was to improve the children's health and thereby improve their

academic performance. Meckel situates these efforts within a larger late nineteenth- and early twentieth-century public discourse relating schools and schooling, especially in cities and towns, to child health. He describes and explains how that discourse and the school hygiene movement it inspired served as critical sites for the constructive negotiation of the nature and extent of the public school's-and by extension the state's-responsibility for protecting and promoting the physical and mental health of the children for whom it was providing a compulsory education. Tracing the evolution of that negotiation through four overlapping stages, Meckel shows how, why, and by whom the health of schoolchildren was discursively constructed as a sociomedical problem and charts and explains the changes that construction underwent over time. He also connects the changes in problem construction to the design and implementation of various interventions and services and evaluates how that design and implementation were affected by the response of the civic, parental, professional, educational, public health, and social welfare groups that considered themselves stakeholders and took part in the discourse. And, most significantly, he examines the responses called forth by the question at the heart of the negotiations: what services are necessitated by the state's and school's taking responsibility for protecting and promoting the health and physical and mental development of schoolchildren. He concludes that the negotiations resulted both in the partial medicalization of American primary education and in the articulation and adoption of a school health policy that accepted the school's responsibility for protecting and promoting the health of its students while largely limiting the services called for to the preventive and educational.
