

1. Record Nr.	UNINA9910787639103321
Autore	Farjon Aljos
Titolo	An atlas of the world's conifers : an analysis of their distribution, biogeography, diversity, and conservation status / / by Aljos Farjon and Denis Filer
Pubbl/distr/stampa	Leiden, Netherlands : , : Brill, , 2013 ©2013
ISBN	90-04-21181-0
Descrizione fisica	1 online resource (524 p.)
Altri autori (Persone)	FilerDenis
Disciplina	585
Soggetti	Conifers - Geographical distribution
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Preliminary Material -- Introduction -- Creating the Atlas of the World's Conifers -- Global and Trans-Continental Distributions -- North America -- Mexico, Central America and the West Indies -- Europe and the Mediterranean -- Mainland Asia and Japan -- Malesia -- Australasia -- South America -- Africa -- Examples of Further Research -- References -- Tables and Indices.
Sommario/riassunto	A 2014 Choice Magazine 'Outstanding Academic Title' An Atlas of the World's Conifers is the first ever atlas of all known conifer species. It is based on locality information of circa 37,000 collected herbarium specimens held in scientific institutions. As well as providing natural distribution maps for each species, Farjon and Filer give the reader comprehensive insight into the biogeography, diversity and conservation status of conifers on all continents, dispelling the widely held view that they are primarily a northern boreal plant group. Conifer diversity is analysed and presented with a taxonomic and geographic perspective. Distribution patterns are interpreted using the latest information on continental drift, dispersal and phylogeny. The entire dataset supporting the Atlas can be consulted and verified online. These data can also be used for further research and are an invaluable resource for anyone working on conifer systematics, biogeography or conservation. An Atlas of the World's Conifers indicates the known distribution of all conifers including an analysis of their biogeography,

diversity and conservation status. Also available from Brill is Aljos Farjon's *A Handbook of the World's Conifers* , published in 2010 (ISBN 978 90 04 17718 5) which is a 2017 Choice Magazine '\Outstanding Academic Title'.
