

1. Record Nr.	UNINA9910787652903321
Titolo	Advanced fibre-reinforced polymer (FRP) composites for structural applications // edited by Jiping Bai
Pubbl/distr/stampa	Cambridge : , : Woodhead Publishing, , 2013
ISBN	0-85709-864-0
Descrizione fisica	1 online resource (xxii, 906 pages) : illustrations
Collana	Woodhead Publishing series in civil and structural engineering, , 2052-4714 ; ; number 46
Disciplina	624.18
Soggetti	Polymeric composites Fibrous composites Building materials Civil engineering
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"ISSN: 2052-4714."
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	part I. Materials -- part II. Processing and fabrication -- part III. Properties, performance and testing -- part IV. Applications.
Sommario/riassunto	Advanced fibre-reinforced polymer (FRP) composites have become essential materials for the building of new structures and for the repair of existing infrastructure. Advanced fibre-reinforced polymer (FRP) composites for structural applications provides an overview of different advanced FRP composites and the use of these materials in a variety of application areas. Part one introduces materials used in the creation of advanced FRP composites including polyester, vinylester and epoxy resins. Part two goes on to explore the processing and fabrication of advanced FRP composites and include
