

1. Record Nr.	UNINA9910787688103321
Titolo	Handbook of organic materials for optical and (opto)electronic devices : properties and applications // edited by Oksana Ostroverkhova
Pubbl/distr/stampa	Cambridge, UK : , : Woodhead Publishing, , 2013
ISBN	0-85709-876-4
Edizione	[1st edition]
Descrizione fisica	1 online resource (xxvii, 804 pages) : illustrations
Collana	Woodhead Publishing series in electronic and optical materials, , 2050-1501 ; ; number 39
Disciplina	621.381045
Soggetti	Optoelectronic devices - Materials Electrooptical devices Optical materials Nonlinear optics Electronic apparatus and appliances - Materials
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"ISSN: 2050-1501 (print)." "ISSN: 2050-151X (online)."
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	part I. Materials for organic (opto)electronics and nonlinear optics : structure-property relations -- part II. (Opto)electronic and nonlinear optical properties of organic materials and their characterization -- part III. Applications of (opto)electronic and nonlinear optical organic materials in devices.
Sommario/riassunto	Small molecules and conjugated polymers, the two main types of organic materials used for optoelectronic and photonic devices, can be used in a number of applications including organic light-emitting diodes, photovoltaic devices, photorefractive devices and waveguides. Organic materials are attractive due to their low cost, the possibility of their deposition from solution onto large-area substrates, and the ability to tailor their properties. The Handbook of organic materials for optical and (opto)electronic devices provides an overview of the properties of organic optoelectronic and nonlinea
