

1. Record Nr.	UNINA9910787715703321
Autore	Mimura Nobuo
Titolo	Asia-Pacific Coasts and Their Management [[electronic resource]] : States of Environment
Pubbl/distr/stampa	Dordrecht, : Springer, 2008
Descrizione fisica	1 online resource (382 p.)
Collana	Coastal Systems and Continental Margins, v. 11 ; ; v.11
Disciplina	333.917095
Soggetti	Coastal zone management
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di contenuto	Front Matter; Introduction: Scope and Objectives of This Book; Drivers for Changes in the Coastal Zone; Environment Problems in the Coastal Zone; Policy for Conservation and Sustainable Development of the Coastal Zone; Regional Conditions; Conclusions: The Rapidly Changing Environment of the Asia and Pacific Region and its Implications for Sustainability of the Coastal Zones; Back Matter
Sommario/riassunto	The Asia-Pacific region is home to the world's largest region of coral reefs and mangroves. It also includes part of the 'Pacific Rim of Fire' and is, therefore, vulnerable to earthquakes and tsunamis. This book gives an overview of the understanding on the drivers, state, and responses to coastal environmental changes in the Asia-Pacific region.
