

1. Record Nr.	UNINA9910787723003321
Autore	Paabo Svante
Titolo	Neanderthal man : in search of lost genomes // Svante Paabo
Pubbl/distr/stampa	New York, New York : , : Basic Books, , 2014 ©2014
ISBN	0-465-08068-5
Edizione	[1st ed.]
Descrizione fisica	1 online resource (289 p.)
Classificazione	SCI027000SCI029000BIO015000
Disciplina	569.9/86
Soggetti	Neanderthals Human population genetics Genome analysis
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di contenuto	Contents; Preface; 1. Neanderthal ex Machina; 2. Mummies and Molecules; 3. Amplifying the Past; 4. Dinosaurs in the Lab; 5. Human Frustrations; 6. A Croatian Connection; 7. A New Home; 8. Multiregional Controversies; 9. Nuclear Tests; 10. Going Nuclear; 11. Starting the Genome Project; 12. Hard Bones; 13. The Devil in the Details; 14. Mapping the Genome; 15. From Bones to Genome; 16. Gene Flow?; 17. First Insights; 18. Gene Flow!; 19. The Replacement Crowd; 20. Human Essence?; 21. Publishing the Genome; 22. A Very Unusual Finger; 23. A Neanderthal Relative; Postscript; Notes; Index
Sommario/riassunto	A preeminent geneticist hunts the Neanderthal genome to answer the biggest question of them all: what does it mean to be human?What can we learn from the genes of our closest evolutionary relatives? Neanderthal Man tells the story of geneticist Svante Paabo's mission to answer that question, beginning with the study of DNA in Egyptian mummies in the early 1980s and culminating in his sequencing of the Neanderthal genome in 2009. From Paabo, we learn how Neanderthal genes offer a unique window into the lives of our hominin relatives and may hold the key to unlocking
