| 1. Record Nr. | UNINA9910787834003321 |
| Autore | Saha Swapan K. |
| Titolo | High-resolution imaging : detectors and applications / / Swapan K. Saha |
| Pubbl/distr/stampa | Boca Raton : , : CRC Press, , [2015] ©2015 |
| ISBN | 0-429-09098-6 981-4613-28-2 |
| Descrizione fisica | 1 online resource (602 p.) |
| Disciplina | 940.1/84 940.184 |
| Soggetti | High resolution imaging |
| Lingua di pubblicazione | Inglese |
| Formato | Materiale a stampa |
| Livello bibliografico | Monografia |
| Note generali | Description based upon print version of record. |
| Nota di bibliografia | Includes bibliographical references and index. |
| Nota di contenuto | Front Cover; Dedication; Contents; Preface; Principal Symbols; Some numerical values of physical and astronomical constants; List of Acronyms; Chapter 1 Properties of Radiation; Chapter 2 Photoelectric Concept; Chapter 3 Concept of Laser; Chapter 4 Photon Detection Process; Chapter 5 Photodetectors; Chapter 6 Charge Transfer Devices; Chapter 7 Photon- Counting Systems; Chapter 8 Radiation Detectors for Infrared Wavelengths; Appendix: Typical Tables; Bibliography; Index; Back Cover |
| Sommario/riassunto | Interferometric observations need snapshots of very high time resolution of the order of (i) frame integration of about 100 Hz or (ii) photon-recording rates of several megahertz (MHz). Detectors play a key role in astronomical observations, and since the explanation of the photoelectric effect by Albert Einstein, the technology has evolved rather fast. The present-day technology has made it possible to develop large-format complementary metal oxide-semiconductor (CMOS) and charge-coupled device (CCD) array mosaics, orthogonal transfer CCDs, electron-multiplication CCDs, electron-avalanche pho |
