

1. Record Nr.	UNINA9910787838003321
Titolo	Endohedral metallofullerenes : basics and applications // edited by Xing Lu, Luis Echegoyen, Alan L. Balch, Shigeru Nagase, Takeshi Akasaka
Pubbl/distr/stampa	Boca Raton : , : CRC Press, , [2015] ©2015
ISBN	0-429-16765-2 1-4665-9395-4
Descrizione fisica	1 online resource (276 p.)
Disciplina	547.05
Soggetti	Organometallic compounds Fullerenes
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record
Nota di bibliografia	Includes bibliographical references at the end of each chapters.
Nota di contenuto	Front Cover; Contents; Foreword; Preface; Editors; Contributors; Chapter 1: Introduction to Endohedral Metallofullerenes; Chapter 2: Preparation and Purification of Endohedral Metallofullerenes; Chapter 3: Computational Studies of Endohedral Metallofullerenes; Chapter 4: NMR Spectroscopic and X-Ray Crystallographic Characterization of Endohedral Metallofullerenes; Chapter 5: Intrinsic Properties of Endohedral Metallofullerenes; Chapter 6: Chemistry of Conventional Endohedral Metallofullerenes and Cluster Endohedral Fullerenes Chapter 7: Oxidative Charge Transfer of EMFs, Biomedical Applications of EMFs, and EMF-Based Nanomaterials and Molecular MaterialsChapter 8: Concluding Remarks and Perspectives; Back Cover
Sommario/riassunto	Knowledge on endohedral metallofullerenes (EMFs) has increased dramatically during the last decade. Numerous research findings have been reported, making it an opportune time to provide a systematic update on EMFs. Endohedral Metallofullerenes: Basics and Applications presents the most comprehensive review on all aspects of EMFs including their generation, extraction and isolation, structural issues, theories, intrinsic properties, chemical behaviors, and potential applications. In this book, the editors have collected an impressive

amount of information regarding this family of a truly sui ge
