

1. Record Nr.	UNINA9910787898303321
<b>Titolo</b>	Desalination : water from water // edited by Jane Kucera
<b>Pubbl/distr/stampa</b>	Hoboken, New Jersey : , : Wiley Wiley & Sons, , [2014] ©2014
<b>ISBN</b>	1-5231-0985-8 1-118-90480-X 1-118-90485-0 1-118-90488-5
<b>Descrizione fisica</b>	1 online resource (660 p.)
<b>Classificazione</b>	SCI013040
<b>Altri autori (Persone)</b>	KuceraJane
<b>Disciplina</b>	628.1/67
<b>Soggetti</b>	Saline water conversion Water - Purification
<b>Lingua di pubblicazione</b>	Inglese
<b>Formato</b>	Materiale a stampa
<b>Livello bibliografico</b>	Monografia
<b>Note generali</b>	Description based upon print version of record.
<b>Nota di bibliografia</b>	Includes bibliographical references and index.
<b>Nota di contenuto</b>	section I. Introduction -- section II. Traditional thermal processes -- section III. Membrane processes -- section IV. Non-traditional desalination processes -- section V. Renewable energy sources to power desalination -- section VI. Future expectations.
<b>Sommario/riassunto</b>	"This is the first volume to cover desalination in such depth and detail, offering engineers, technicians, and operators full coverage of the applications, economics, and expectations of what will certainly become one of the most important water-related processes on the planet. Covering thermal processes and membrane processes, this is the only volume any engineer working in desalination must have, covering both practical and theoretical issues encountered on a daily basis. Certain to be an important contribution to the water management community"--
