

1. Record Nr.	UNINA9910787898303321
Titolo	Desalination : water from water / / edited by Jane Kucera
Pubbl/distr/stampa	Hoboken, New Jersey : , : Wiley Wiley & Sons, , [2014] ©2014
ISBN	1-5231-0985-8 1-118-90480-X 1-118-90485-0 1-118-90488-5
Descrizione fisica	1 online resource (660 p.)
Classificazione	SCI013040
Altri autori (Persone)	KuceraJane
Disciplina	628.1/67
Soggetti	Saline water conversion Water - Purification
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	section I. Introduction -- section II. Traditional thermal processes -- section III. Membrane processes -- section IV. Non-traditional desalination processes -- section V. Renewable energy sources to power desalination -- section VI. Future expectations.
Sommario/riassunto	"This is the first volume to cover desalination in such depth and detail, offering engineers, technicians, and operators full coverage of the applications, economics, and expectations of what will certainly become one of the most important water-related processes on the planet. Covering thermal processes and membrane processes, this is the only volume any engineer working in desalination must have, covering both practical and theoretical issues encountered on a daily basis. Certain to be an important contribution to the water management community"--
