Peradeniya and the plantation economy in Ceylon Eugenia Herbert (Mount Holyoke College, USA)7. Eco-cultural networks in southern China and colonial New Zealand, 1860s-1910s James Beattie8. Colonial

Cultures of Hunting Kate Hunter (Victoria University, New Zealand)9.
Game of Empires: Hunting in Treaty-Port China Robert Peckham
(University of Hong Kong)10. Experiments, Local Environments, and
Networks in Rice farming in South-Eastern Australia, 1900-1945 Emily
O'Gorman11. Animals and Urban Environments: Managing Domestic
Animals in Nineteenth-Century Winnipeg Sean Kheraj (York University,
Canada)13. Reflections and New Research DirectionsBibliographyIndex.

Sommario/riassunto

"19th-century British imperial expansion dramatically shaped today's globalised world. Imperialism encouraged mass migrations of people, shifting flora, fauna and commodities around the world and led to a series of radical environmental changes never before experienced in history. Eco-Cultural Networks and the British Empire explores how these networks shaped ecosystems, cultures and societies throughout the British Empire, and how they were themselves transformed by local and regional conditions. This multi-authored v. begins with a rigorous theoretical analysis of the categories of 'empire' and 'imperialism'. Its chapters, written by leading scholars in the field, draw methodologically from recent studies in environmental history, post-colonial theory, and the history of science. Together, these perspectives provide a comprehensive historical understanding of how the British Empire reshaped the globe during the 19th and 20th centuries. This book will be an important addition to the literature on British imperialism and global ecological change."--
