It presents the first book-length reassessment of Wilfred Bion's ideas on groups. Every group has a purpose or purposes - or, as Bion put it, "every group, however casual, meets to 'do' something." The approach described here shows how individual group members' use of attention - both broad or "evenly suspended" and focused - can promote a better understanding of purpose, making it possible for them to do what they have met to do. This work of attention enables group members to maintain a clear sense of their purpose and also to recognise how easily they can become distracted, losing focus and dispersing their energies into activities that are off task. The approach builds on the authors'

experience of using Bion's insights into group dynamics over twenty-

five years in different contexts, formal and informal, as group members, managers, leaders, teachers, consultants, researchers, family members, and friends.
