This lively, provocative text presents a new way to understand

friendship. Professor John Terrell argues that the ability to make friends

Sommario/riassunto

is an evolved human trait not unlike our ability to walk upright on two legs or our capacity for speech and complex abstract reasoning. Terrell charts how this trait has evolved by investigating two unique functions of the human brain: the ability to remake the outside world to suit our collective needs, and our capacity to escape into our own inner thoughts and imagine how things might and ought to be. The text is richly illustrated and written in an engagi
