Sommario/riassunto	Sources of State Practice in International Law is a descriptive bibliography of both electronic and printed sources of information containing the text of treaties and the record of diplomatic activity of important jurisdictions around the world. As such, it includes an up-to-date description of national treaty portals and other valuable Internet-

based sources. At the same time, it also includes descriptions of printed sources providing access to treaties and official diplomatic documentation difficult to locate in standard compilations. In addition, this work includes a narrative section for each jurisdiction summarizing issues related to treaty succession and treaty implementation in municipal law. Sources of State Practice in International Law is an indispensable reference for researchers in both international law and international relations.
